

# Carbon-Flex Heating System

- Wall-to-wall carbon fiber heaters on back wall and sidewalls
- Side wall heaters extending all the way down to floor level
- Exclusive bench seat heaters with on/off button
- Exclusive in-floor heating systems with heated ceramic tiles
- Far-infrared wavelengths within the "Vital Range" with most being 8.4-9.4 microns

## CarbonFlex® Heating System

For Sport and Body Conditioning...Far-Infrared by Saunatec

Far-Infrared is perfect as a "heat therapy room" for athletes looking for a pre-workout warm-up – to warm up muscles and increase flexibility, helping to prevent injury. It's also ideal for pre-warm-up for physical therapy and massage therapy, or for a relaxing wind-down at the end of a stress-filled day. Far-Infrared heat is also ideal for soothing sore muscles and joints after a workout.

A Saunatec Far-Infrared sauna provides soothing heat, directly radiated to the body, with almost no time waiting for preheating. The far-infrared radiant heat induces a deep sweat – for cleansing and detoxifying the body and for burning calories. Using the latest Japanese far-infrared technology, Saunatec's CarbonFlex heating panels have the largest surface area of any IR sauna heating system – providing the softest heat.

Saunatec's CarbonFlex performs better than other IR systems, with a near-perfect wavelength of 8.4 to 9.4 microns (well within the "Vital Range" of 7 to 14 microns). This optimal wavelength provides for deeper penetration of far-infrared heat – which, in turn, can enhance detoxification, cardiovascular conditioning and relief from muscle and joint aches and pains.
